 **CIARKO**

**WHO  
WE  
ARE?**

**3.**

**We are Ciarko family.  
Biggest cooker hood producer in Poland.**

We proudly design exclusively **in Poland**. We manufacture up to **3,500** cooker hoods per day, utilizing more than **20,000** square meters of production space. All hoods are fully designed and manufactured by our team of over **500** employees.

**Ciarko** is a **family company** not only because of its founder. Throughout the organization, more than **100 families** help create the **Ciarko** brand **every day**, ensuring the unquestionable quality of our products. From the very beginning, the company's mission has been sustainable development and environmental protection.

This year, the company will make an investment in renewable energy that will reduce the consumption of electricity produced during operation, **up to 80%!**

The brand's products have been **appreciated in over 48 markets worldwide**, and technologies (among other things, gesture-controlled hood, air ventilation function) allow to improve the quality of time spent in the kitchen for millions of people around the world every year!

# PRODUCT LINES.

## BASIC

In our **Ciarko Basic** Line we would like to showcase a great selection of economical hoods. Cooker hoods from **Ciarko Basic** line are widely associated with functions and efficiency essential for daily use. This range of cooker hoods is dedicated especially for small-sized kitchens and hobs, which means that these hoods are produced in 50 or 60 cm width concerning the size and most models are equipped with mechanical control function. We offer **Ciarko Basic** products in **high-volume orders**.

## COMFORT

In our **Ciarko Comfort** Line we offer customized cooker hoods with modern design in different sizes. **Ciarko Comfort** offers a wide range of products featuring quality glass and stainless steel together with modern electronic control panels which means multifunctionality and high efficiency for the user. The Customer has the possibility to specify the hoods by selecting the Motor Efficiency (Energy class and Airflow), LED Lighting and Filter Quality. **Ciarko Comfort** is a perfect blend of high quality and affordability. The Comfort Line products are available at **mid-volume orders**.

## PREMIUM

**Ciarko Premium** is our prestigious line of the highest quality standards in cooker hoods, for which we were rewarded with many prestigious prizes. As the name suggests this is the most advanced category; products are equipped with cutting-edge technology such as smell sensors, gesture control or brushless motors which are described as energy saving and almost inaudible on first gears. In this category we combine newest technology with unique design. In **Premium** line we offer many advanced hoods in range of: Ceiling, Downdraft, Built-in, Island and Vertical cooker hoods. The Premium hoods are available at **low-volume orders**. Some of them are available exclusively through Ciarko Design.

## CIARKO DESIGN

**Ciarko Design** is made for those who want the best. It's built on over 35 years of **experience and knowledge from 48 countries**, mixing advanced technology with the world class design. It's all about making cooker hoods **amazing and stylish**, perfect for people who love things that look good and work great.

**AC MOTOR**

**BLDC MOTOR**

# TYPE OF MOTORS.

## AC MOTOR

The **AC motor** for range hoods ensures powerful and efficient air extraction, keeping your kitchen free from smoke, odors, and grease. It operates quietly and reliably, providing long-lasting performance and consistent airflow.

## BLDC MOTOR

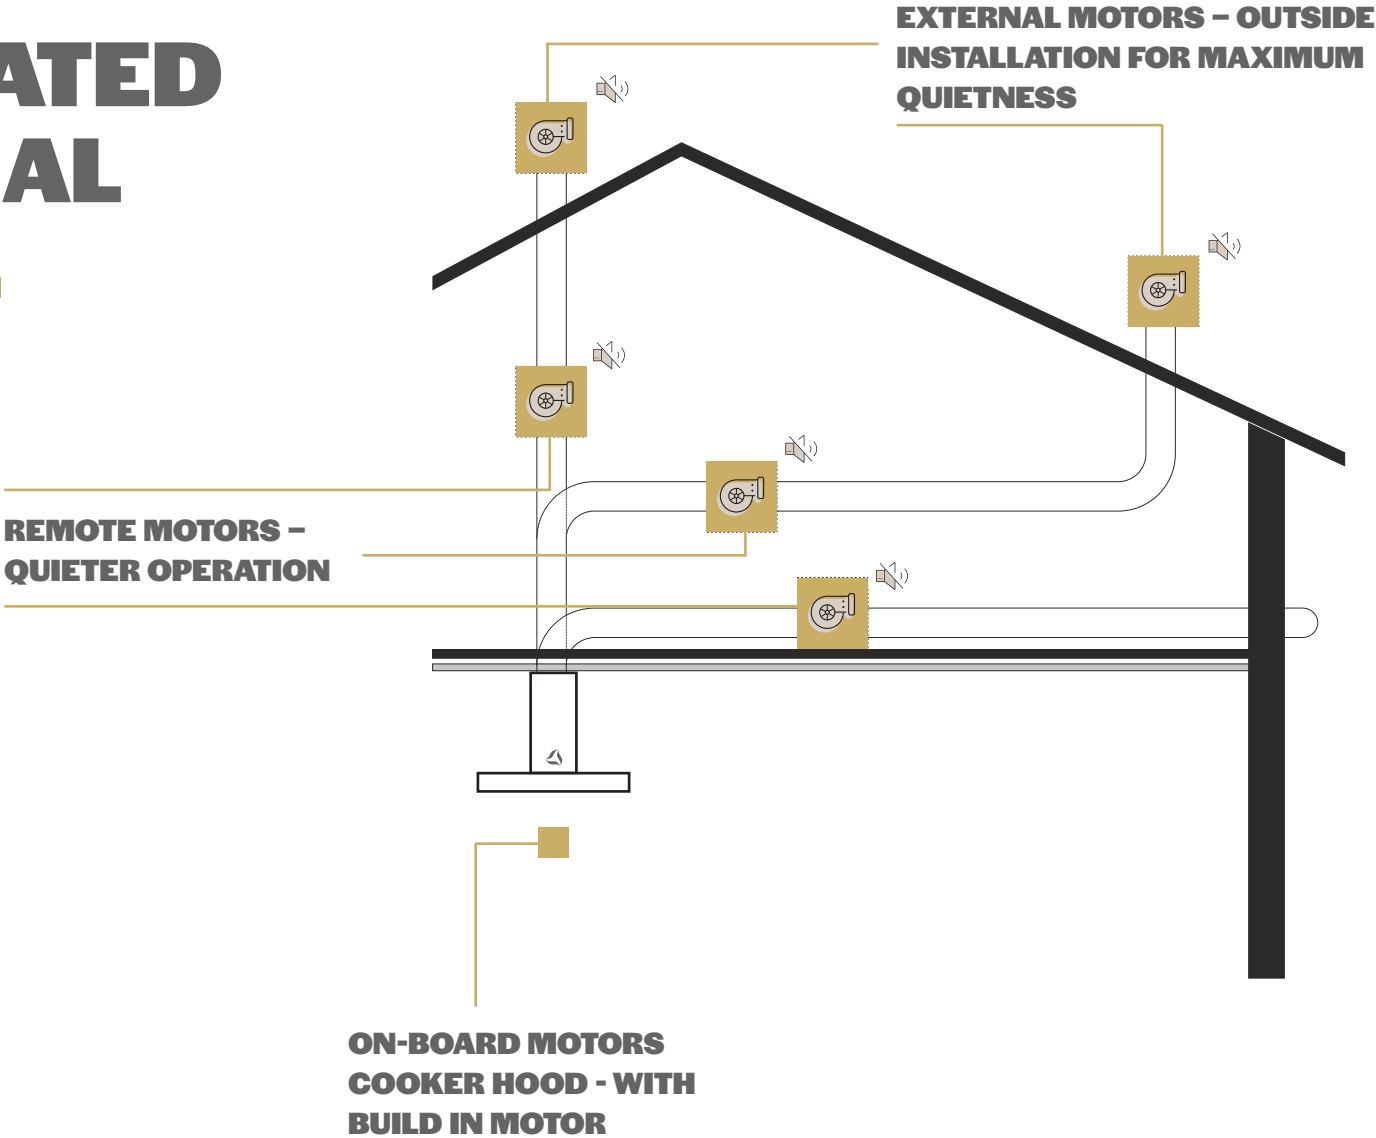

The **brushless motor** for range hoods delivers high performance with exceptional energy efficiency and quiet operation. Its advanced technology ensures reliable, long-lasting functionality while maintaining powerful and consistent airflow. Designed for modern kitchens, it offers a high-performance, eco-friendly solution for effective and silent ventilation.

What do we look for when buying a kitchen hood? Reliable studies show that we focus primarily on volume and performance. Knowing these needs and with many years of experience behind us, we offer products, perfectly matching the features you are looking for. The technology developed by Ciarko and the knowledge of engineers from the Warsaw University of Technology resulted in the creation of the unique **BLDC Motor**.

It is extremely quiet during operation, and also achieves an energy class of **A+++**, which **reduces energy consumption by up to 95%**. Its operation in the first gear, when it needs only **8 W**, can be compared to the energy consumed by a single **small light bulb**. Thanks to the innovative housing, we can reduce the noise level of the hood during operation by as much as **6 dB!** What does this mean in practice? Among other things, the fact that it will not interfere with our conversations, and this is a huge advantage that is becoming our standard. **Ciarko was one of the first brands on the market to lower the volume level of hoods below 40 dB.**

**Depending on the selected motor, the performance will vary for each hood. The performance values in the portfolio are provided as an indication.\***

# INTEGRATED EXTERNAL MOTOR.

# MOTOR SOLUTION.

We offer different motor solutions for range hoods to ensure powerful ventilation, flexibility, and reduced noise. Whether the motor is inside the hood or placed outside for a quieter kitchen, our solutions provide efficient and reliable performance.

## **1. On-Board Motors – Built into the Hood**

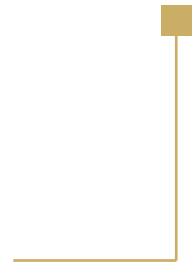

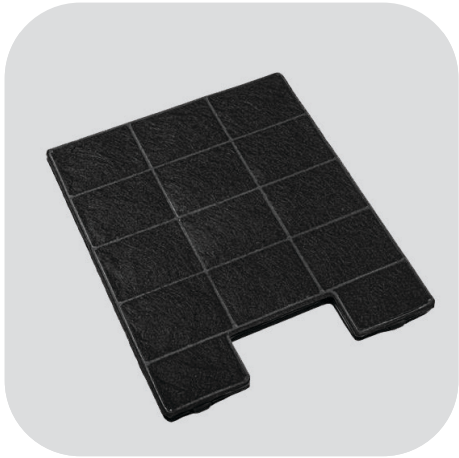

Our on-board motors are installed directly inside the range hood. This is a compact and simple solution that provides strong ventilation without extra installation effort.

## **2. Remote Motors – Quieter Operation**

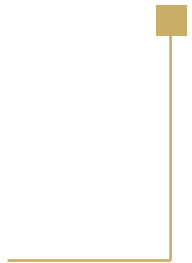

For a quieter kitchen, our remote motor solutions allow the motor to be placed up to 8 meters away from the hood. The motor can be installed in another location, such as a cabinet, attic, or technical room. This reduces noise while maintaining strong suction power.

## **3. External Motors – Outside Installation for Maximum Quietness**

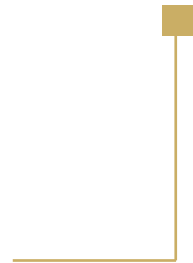

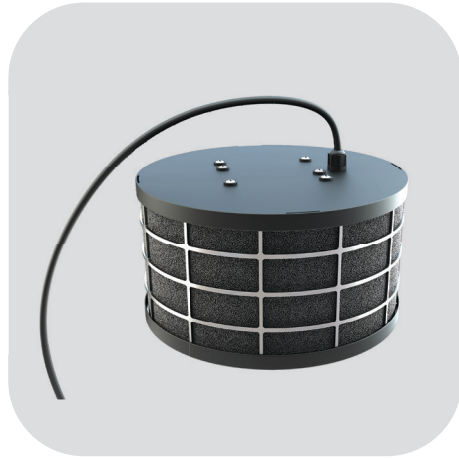

For the quietest and most powerful option, we offer electronic solutions that can be connected to external motors installed outside the house, usually on the roof or an exterior wall. This keeps the noise completely away while ensuring excellent ventilation.

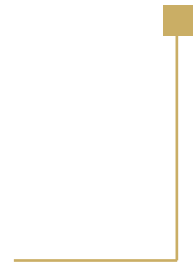

**CHARCOAL  
FILTERS**

**HIGH-  
PERFORMANCE  
LONG-LIFE FILTERS**

**PLASMA

**BAFFLE  
FILTERS**

# FILTERING.

Cooker hoods improve kitchen air **quality by filtering** out grease, moisture, and odors. While extraction hoods push (filtered air) directly outside, recirculating hoods use different filter systems to clean and return the air to the room. Various filter solutions are available, each of them with different benefits and maintenance requirements.

## 1. Activated Carbon Filter

### Function & Benefits:

- Absorbs and neutralizes unpleasant odors.
- Improves air quality in recirculation mode.
- Needs to be replaced every 3–6 months.

## 2. Long-Life Activated Carbon Filters

### Function & Benefits:

- Can be regenerated by heating in an oven.
- Lasts up to 3 years.
- Saves long-term costs and reduces waste.
- Effectively removes odors.

## 3. Plasma Filter

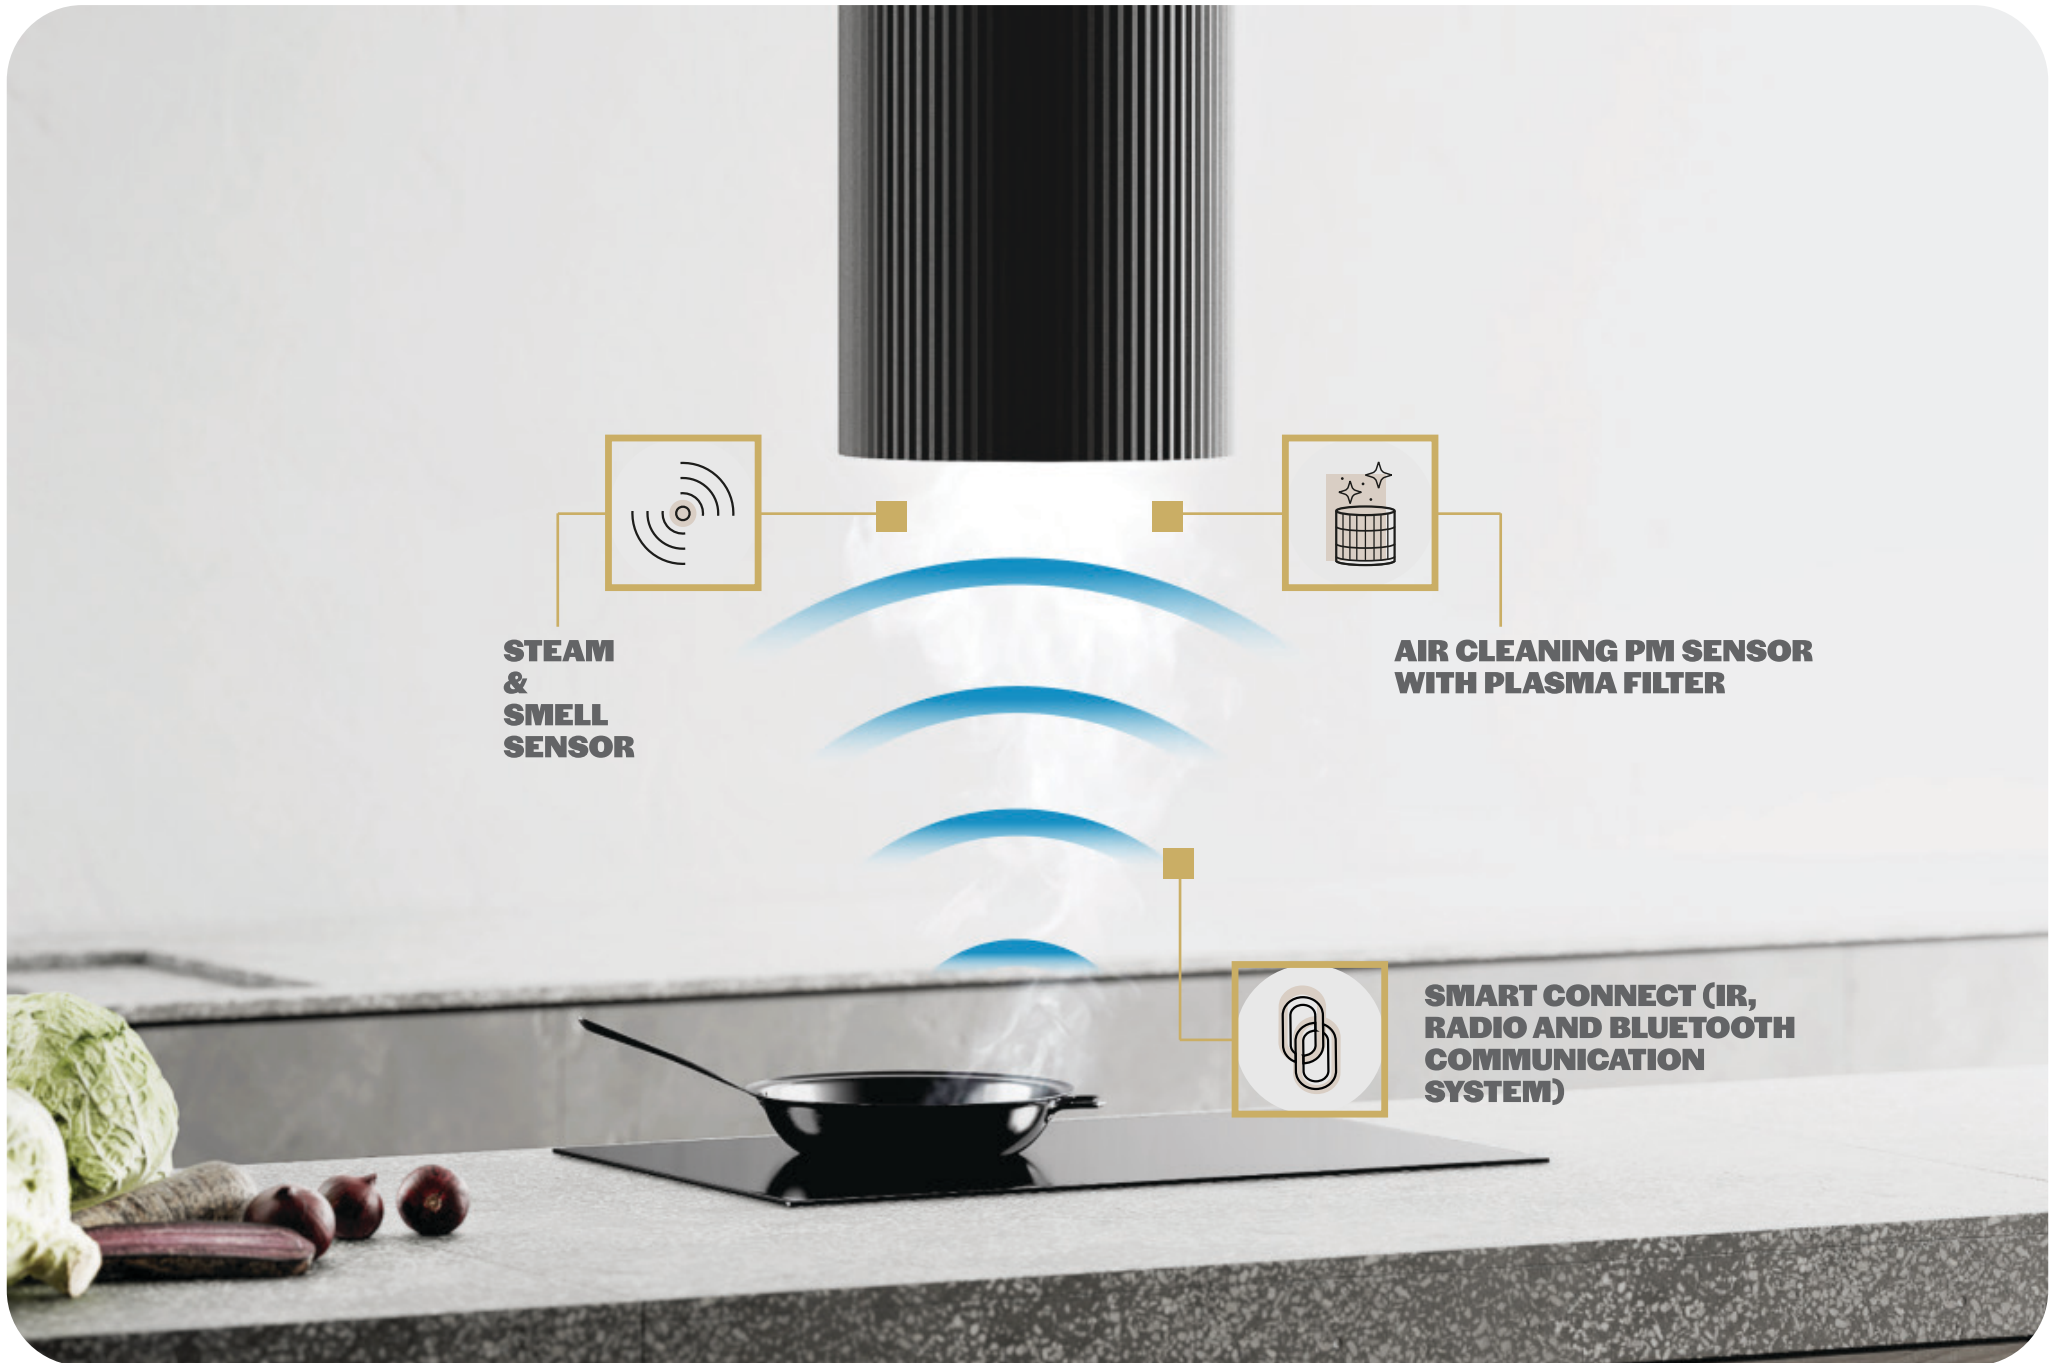

### Function & Benefits:

- Converts odor molecules into oxygen, water vapor, and carbon dioxide.
- Removes not only odors but also bacteria and pollutants.
- Extremely durable (often up to 10 years with little to no maintenance).
- Ideal for allergy sufferers or those with high hygiene standards.
- Higher initial cost but economical in the long run.

## 4. Baffle Filters

### Function & Benefits:

- Made of durable stainless steel.
- Commonly used in professional kitchens.
- Improves air purification.
- Extends the lifespan of the ventilation system.
- Resistant to corrosion.
- Easy to clean, suitable for demanding users.

**STEAM  
&  
SMELL  
SENSOR**

**AIR CLEANING PM SENSOR  
WITH PLASMA FILTER**

**SMART CONNECT (IR,  
RADIO AND BLUETOOTH  
COMMUNICATION  
SYSTEM)**

# SENSORS.

## **AiSense Intelligent Sensor in Cooker Hoods**

Upgrade your kitchen with our Intelligent Sensor. It constantly monitors humidity, temperature, and VOC (volatile organic compounds) levels to keep your kitchen fresh and comfortable.

### **How It Works**

The sensor uses smart technology to instantly check air quality. When it detects changes, the hood automatically adjusts its speed from 1 to 3 to remove odors and excess moisture without any manual input.

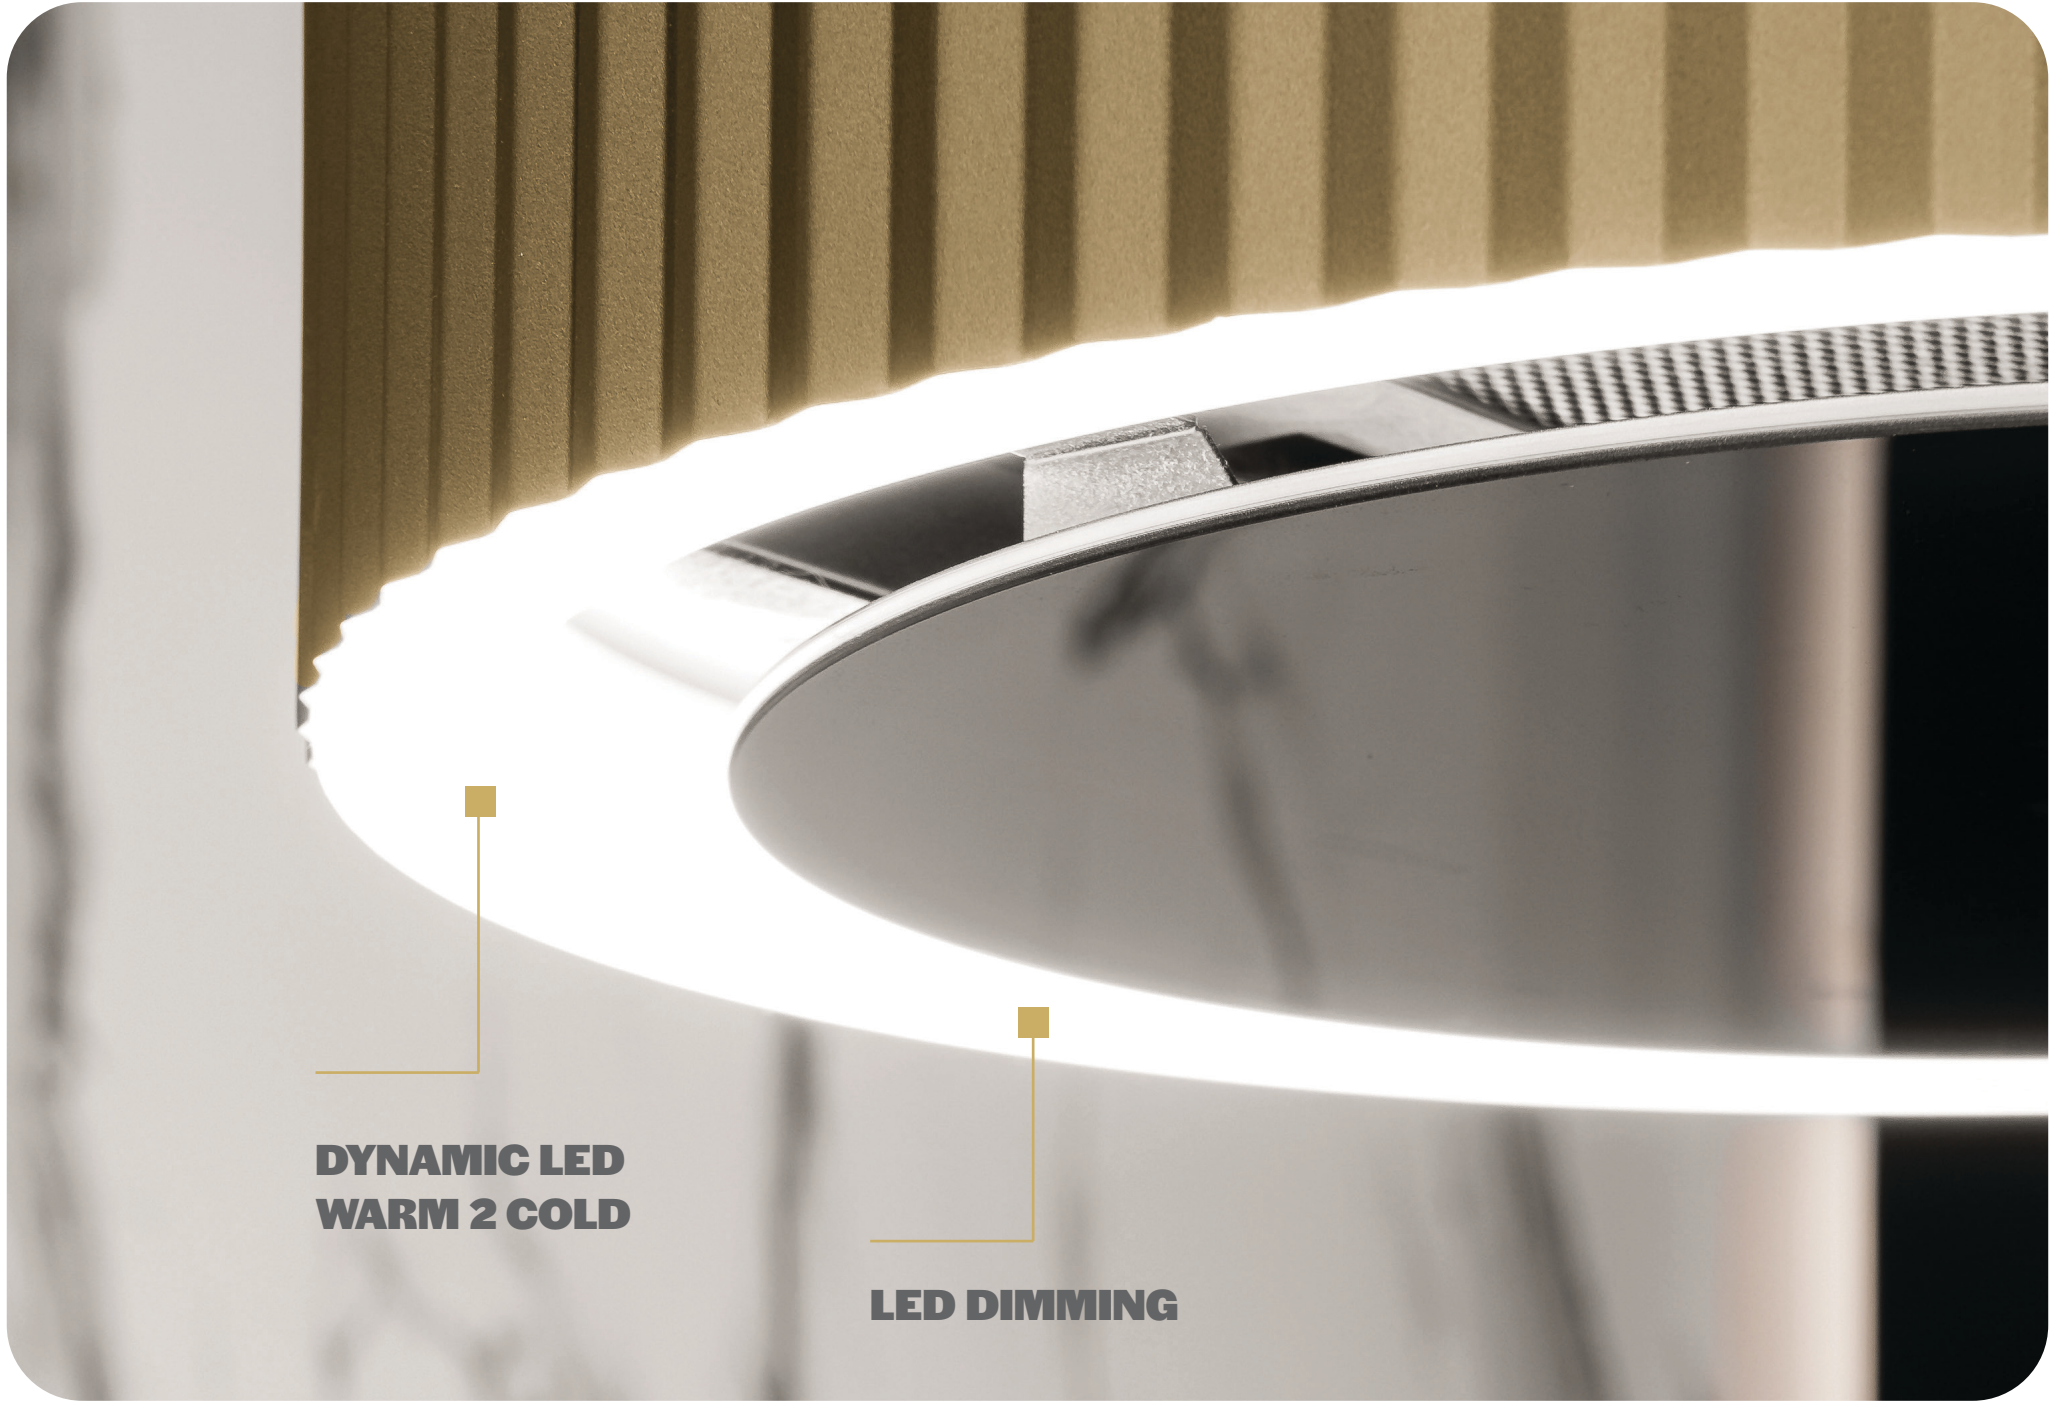

### **Smart Learning**

Over time, the sensor learns your cooking habits. Each time you cook, it better understands your preferences and adjusts the hood to match your lifestyle, providing a personalized ventilation experience.

## **Smart Connect**

### **(IR, radio and Bluetooth communication system)**

Touchless harmony between the cooktop and the hood eliminates manual control! Automatic power adjustment ensures optimal hood performance based on cooking intensity without the need for manual setting changes, while still allowing users to deactivate this function if desired. Additionally, the hood can be controlled directly from the induction cooktop, providing seamless integration and effortless operation.

**DYNAMIC LED  
WARM 2 COLD**

**LED DIMMING**

# COLD, WARM, WARMER.

If you hesitate whether to choose a warm or cool light colour together with Ciarko you can resolve this dilemma once and for all. **Warm2ColdLED** technology gives us the option to adjust the light colour from **2900K to 6000K**. Warm light, close to sunlight, does not tire the eyes, improving our well-being; while cooler light allows us to expose details and emphasizes the character of the interior. In addition to endless possibilities in kitchen design, **Warm2coldLED** has another advantage: it illuminates the workspace with minimal power consumption. And this is true regardless of the time of day or the weather conditions outside the window.

**ELECTRONIC  
CONTROL**

# INNOVATIVE HOOD CONTROL SYSTEM.

## Innovative Control Solutions for Range Hoods

Our range hoods are designed for maximum comfort, efficiency, and ease of use, offering a variety of control options to suit different needs. From simple mechanical switches to advanced gesture controls, our innovative solutions provide smooth operation and modern convenience.

### 1. Mechanical Control – Simple & Reliable

For those who prefer a straightforward and durable solution, our mechanical control option offers easy operation with classic push buttons, rocker switches or rotary switches.

### 2. Soft-Touch Electronic Control – Effortless & Modern

Our electronic soft-touch control provides a smooth and precise way to adjust fan speed and lighting. A subtle press of the buttons provides effortless operation with a sleek and modern design.

### 3. Touch Control – Elegant & Smart

For a high-end, seamless experience, our glass touch control offers an elegant, fully integrated interface. A simple tap on the sleek glass panel activates the hood's functions, providing a high-tech and sophisticated look.

### 4. Gesture Control – Hands-Free Convenience

Experience the ultimate convenience with our gesture control technology. A simple hand movement is enough to turn the hood on or off, adjust the fan speed, or control the lighting—perfect for busy kitchens when hands are messy or occupied.

**RADIO  
REMOTE  
CONTROL**

**IR REMOTE  
CONTROL**

# REMOTE CONTROL.

## **Remote Controls**

Our cooker hoods can be paired with radio control and an IR remote for easy operation. These remote functions include motor control, lighting options, and a timer. Thanks to the magnetic construction, the remote controls can be easily attached directly to the hood.

**RF Remote:** The RF remote allows operation from a greater distance without requiring a direct signal path to the hood's control unit.

**IR Remote:** The IR remote requires an unobstructed signal path to the hood's control unit to function properly.

# SPACE MAX JOKER.

The original 7 cm deep air duct intended for the Uno Joker and Duo Joker hoods ensures safe removal of **moist air also in the absorber mode** (thanks to a special Ciarko Design accessory in the SpaceMAX Joker System). **Can be adjusted to any width, height and depth of the cabinet.** Ergonomic and the aesthetic layout of the cabinet (rectangle) means as much as **80% of the space saved** in the cabinet! See more on Ciarko Design Portfolio.
